## I. Objectives

The objective was to establish communication and make sure the IDE and java package were installed correctly. This came in the form of “Hello World!” being printed to system output.

## II. Requirements

Get “Hello World!” to print to the system output.

## III. Design:

Declare class > Declare main method > print “Hello World!” >...  
end class > end main method

## III. Test Plan/Test Strategy

Test	Expected Result	Pass/Fail
Run program	“Hello World!” printed to system output	

## IV. Results

Run test was successful

```
"C:\Program Files\Java\jdk-17.0.4.1\bin
Hello World!

Process finished with exit code 0
|
```

## V. Discussion

I learned how to print strings to the system output. There were no issues.
